SEED ROUND · 2027

Tidepool

Auto-rebalancing stablecoin yield across Ethereum L2s.

Raising $3.5M · SAFE + token warrant

EXECUTIVE SUMMARY

One deposit. Best stable yield. Zero babysitting.

Problem

Stablecoin yield is scattered across 40+ venues on many chains; most holders sit below 3%.

Product

Deposit USDC once. Tidepool routes to the best risk-adjusted yield and rebalances automatically.

Traction

Beta TVL grew from $0.4M to $9.1M in six months with 1,850 depositors (illustrative).

Ask

$3.5M seed to ship mainnet on three L2s, harden security and open institutional vaults.

PROBLEM

Stable yield is fragmented and manual.

72%

of stablecoin holders earn under 3% APY (illustrative)

Why it stays broken

40+ venues, 5+ chains

Rates move hourly; nobody tracks them all.

Gas + time to rebalance

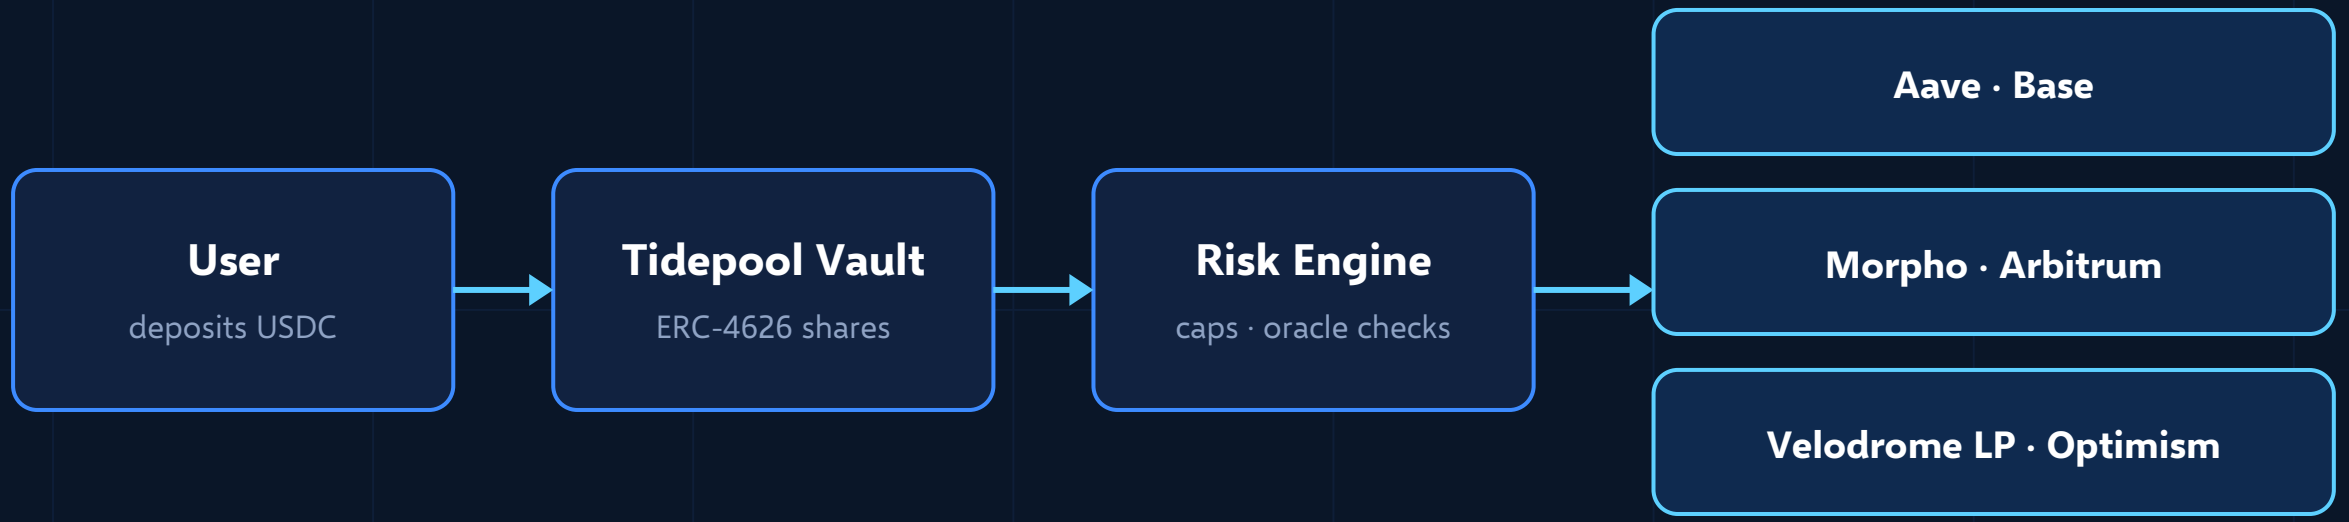

Manual moves eat most of the spread for small wallets.

Opaque risk

Users can't compare oracle, depeg and smart-contract risk.

PRODUCT

How a deposit becomes yield.

Rebalances when the risk-adjusted spread beats gas + slippage. Withdraw anytime; no lockups.

Strategy set shown is illustrative for this fictional sample.

WHY US

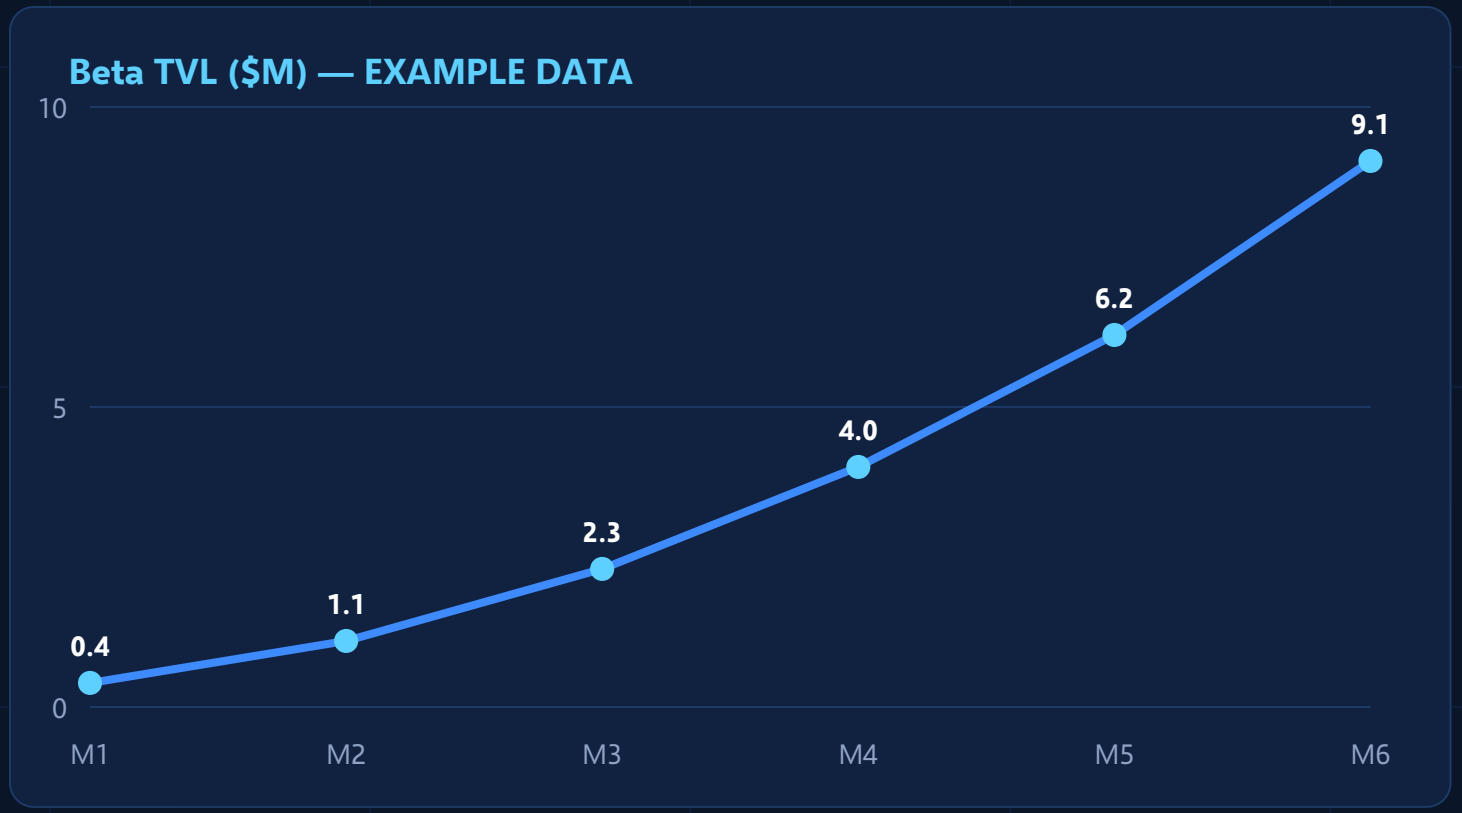

Routing + risk + gas, in one vault.

Capability	Tidepool	Single-venue vault	Yield aggregator A	Manual DIY
Multi-L2 routing	✓	—	partial	✓
Auto rebalancing	✓	—	✓	—
Risk caps per strategy	✓	✓	—	—
Gas-aware execution	✓	—	—	—
No lockup	✓	✓	—	✓

TRACTION

Six months of beta, compounding.

All figures illustrative — fictional sample.

BUSINESS MODEL & TOKEN

We earn only when depositors earn.

Business model

Deposit / withdraw fee	0%
Performance fee (on yield)	10%
Share of fees to TIDE stakers	20%

TIDE token utility

1. **Governance**
   Vote on strategy whitelist, caps and fee params.
2. **Fee-share staking**
   Stakers receive 20% of protocol fees.
3. **Risk backstop**
   Staked TIDE is first-loss cover for strategy incidents.

ROADMAP & SECURITY

Ship carefully, then ship wide.
